

1. The images may be line drawings, data drawings or photos

2. Gray scale images provide protection for all colours, but both colour and grayscale images are accepted. Each colour combination counts as a design

3. Show the design from several angles, but only one angle of view per image file.

4. The pictures must be clear and sharp.

5. The images must show the design clearly and against a neutral background

6. The pictures must not contain shadows that interfere with the images

7. The pictures must not contain disturbing light reflections

8. The pictures must not contain other objects, people, explanatory text or dimension lines

9. You can register parts of a product. Use dotted lines for that part of the product that is not included or show the part separately
